

GULFIUM EP GREASES

Tesla Gulfium Extreme Pressure Greases (EP) are black colored lithium grease that provides effective lubrication of ball, roller and plain bearings in a variety of equipments. It is suitable for bearings operating at temperatures as high as 121 deg C and is used above this temperature with more frequent re-lubrication.

They are ideal for multipurpose applications, automotive and industrial use, where extreme pressure and severe working conditions such as shock loading exist. They are suitable for both steel-on-steel and steel on bronze applications, resist water wash-out and effectively protect against rust and corrosion.

It is recommended for use where water contamination is encountered, and is suitable for bearings operating at temperatures as high as 121 deg C or higher if replenished frequently. They are available in two NLGI grades, 2 and 3.

Specifications met: Ford M1C75B and NLGI LB

NLGI Grade	2	3
Soap Thickener	Lithium, with EP	Lithium, with EP
Texture	Smooth, buttery	Smooth, buttery
Dropping Point, deg C	180	180
Penetration, D 217, Worked	280	235
Timken OK Load, Lbs Min	40	40
4-Ball Weld Point, Kg,Min	225	228
Oil Viscosity at 100C, cst	17	17
P.Code	1636	1637

Color Varies from Country to Country. Properties mentioned above are typical only and minor variations, which do not affect the product performances, are to be expected in normal manufacturing. Advice and opinion noted herein are given in good faith and on the basis of the best information available, information is based on past history of the grade only and must not be construed as a guarantee of performance nor any legal liability is accepted by Tesla Corporation or any of its affiliates. Follow equipment manufacturer's recommendations for performance level and viscosity grade.
